RECENT PROJECTS

Photoshop Basic +

April.-Jun. 2016

Designed and developed a user-friendly and responsive website for old people to learn some basic photoshop skills. Gained hands on using interactive design concepts, code, UI design elements, and visual characteristics to invite interaction and communicate. Hacked the Bootstrap and jQuery UI component to improve user experience.

Travel Website

Jan. 2016

Programming of a customized trip planning website. Followed important features of responsive web design. Developed the website by the HTML/CSS3/JS.

Code text model

Jan. 2016

Used HTML/CSS/JS to create a code text model. Improved resizing font function by jQuery. Optimized user experiences by Bootstrap components.

Fishing Master

Nov.-Dec. 2015

Designed a desktop game with rich interaction on user-end.
Implemented the application by using Processing.
