## RECENT PROJECTS

### EventsUp Mobile Application

Feb.-Mar. 2016

Applied important principles of interactive design. Enhanced application by learning from usability test and promoted it by vividly storytelling. Used Balsamiq Mockups, Sketch, and InVision to implement the application

### Travel Website

Jan. 2016

Programming of a customized trip planning website. Followed important features of responsive web design. Developed the website by the HTML/CSS3.

### Code text model

Jan. 2016

Used HTML/CSS/JS to create a code text model. Improved resizing font function by jQuery. Optimized user experiences by Bootstrap components.

### Portfolio Website

Dec. 2015

Designed my first website independently by following Google Material Design guide, implemented the HTML/CSS/JS codes via Adobe dreamweaver. Hacked the Bootstrap and jQuery UI component to improve user experience.

### Fishing Master

Nov.-Dec. 2015

Design a desktop game with rich interaction on user-end. Implemented the application by using Processing.
